DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17, drawn to aquaculture of aquatic animals, classified in class 119, subclass 201.
- II. Claims 18-24, drawn to water containing liner material, classified in class 138, subclass 149.
- III. Claims 25-28, drawn to a polymer liner, classified in class 405, subclass 258.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as creating swimming pools, beverage containers, rain water retention basin, irrigation channels for plants, or pipe liners. See MPEP § 806.05(d).

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as to prevent soil erosion by containing sand or soil, as a plant pot liner, or as a landfill liner. See MPEP § 806.05(d).

such as to prevent soil erosion by containing sand or soil, as a plant pot liner, or as a landfill liner. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or III and the search required for Group II is not required for Group III, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
